

Stair Nosing Installation Instructions

Maintenance & Care

- Ensure the stairs are dry, clean, free of debris, level and even.
- Ensure the correct nosing is placed onto the correct stair and check for a good fit.
- Use the drill holes to mark the step for drilling location.
- Remove the stair nosing and drill and plug in the appropriate marked drilling location.
- Apply suitable adhesive to the bottom of the nosing tread and re-apply nosing to step.
- Screw stair nosing down firmly using recommended screw size
- Apply insert pip to cover screw head.

Cleaning Instructions

Regular cleaning and maintenance is essential to avoid the build up of dirt or other contaminants, which will reduce the performance of the stair nosing and the slip resistance offered. Regular maintenance will also ensure the longevity of the products appearance.

Inserts

All inserts should be cleaned with a neutral detergent and thoroughly rinsed with clean water. Ensure the inserts are dry prior to receiving any traffic.

Aluminium

These can be lightly polished using steel wool to assist in maintaining the longevity of its appearance.

Under no circumstances should any solvent based products be utilised in the cleaning and maintenance of Genesis Flooring Accessory products.

Contact adhesive such as Gripfill can be used for these Nosing's
